

Priyanka Tambe

Software Engineer | Java Backend Developer | AI/ML Enthusiast

Cork, Ireland • +353 89 456 5168 • tambe2708@gmail.com • linkedin.com/in/priyanka-t-17535219b

PROFESSIONAL SUMMARY

Java Software Engineer with 3.5 years of production experience designing and developing Spring Boot microservices, RESTful APIs, and cloud-integrated backend systems. Strong foundation in OOP, SOLID principles, testing and CI/CD, complemented by an MSc in Artificial Intelligence with hands-on machine learning and LLM evaluation experience. Automated 200+ workflows, improved system uptime by 15%, and reduced manual effort by 45% across production projects.

SKILLS

Languages & Frameworks: Java, Spring Boot, Hibernate, JPA, Python

Architecture: Microservices, RESTful APIs, OOP & Design Patterns (SOLID)

Databases: PostgreSQL, MySQL, MongoDB, Redis, SQL

Cloud & DevOps: AWS (EC2, S3), Azure, Docker, Git, GitHub Actions, Jenkins, Maven

Testing: JUnit 5, Mockito, TestNG, Postman, Swagger

AI & Automation: Machine Learning (Scikit-learn, TensorFlow), LLM Evaluation, UiPath RPA

WORK EXPERIENCE

Freelance Java Developer — Jan 2026 – Jun 2026

Self-Employed, Remote, Ireland

- Developed a Java & Spring Boot IT support ticket management system with REST APIs for creation, assignment, prioritisation, status tracking and resolution.
- Used Spring Data JPA and PostgreSQL for persistence, with Spring Security and role-based access control.
- Built automated ticket assignment, SLA tracking, and a knowledge-base recommendation feature for recurring issues.
- Containerised the app and database using Docker & Docker Compose; tested with JUnit 5 and Mockito.

Software Engineer (3.5 Years) — Apr 2021 – Aug 2024

Tech Mahindra, Pune, India

- Designed, developed and maintained Java/Spring Boot microservices and REST APIs for a telecom client's enterprise platform.
- Integrated machine learning models into production monitoring systems for real-time anomaly detection.
- Contributed to AI chatbot and RPA-driven IT operations automation, combining Java backend integration with custom NLP models.
- Wrote automated unit/integration tests (JUnit 5, Mockito, TestNG) and used Git-based CI/CD (GitHub Actions, Jenkins).
- Performed root cause analysis on production incidents and documented architectural decisions.
- **Achievements:** Reduced manual effort by 45% (asset onboarding platform) · Cut false alerts by 60% and improved uptime by 15% (ML alarm correlation) · Automated 200+ workflows, driving 40% faster resolution.

Software Engineer Intern — Jan 2021 – Mar 2021

Tech Mahindra, Pune, India

- Hands-on experience with Java, MySQL and backend fundamentals; certified as a UiPath Developer.

Engineer Intern — Mar 2019 – Jul 2019

Zensar Technologies, Pune, India

- Completed training in OOP, REST API development and database management.

PROJECTS

EUC Asset Management Platform (Tech Mahindra)

Java Spring Boot microservices platform automating onboarding/offboarding of end-user computing assets. Reduced manual effort by 45%.

AIOps & IT Infrastructure Monitoring (Tech Mahindra)

Real-time AIOps solution using ScienceLogic and custom ML models for anomaly detection. Reduced alert noise 60%, improved uptime 15%.

MSc Thesis – Dynamic Adaptation of LLMs for IT Ticket Resolution (MTU, 2025)

Multi-metric evaluation framework benchmarking GPT-2 vs Mistral on 1,954 real IT questions. 50% semantic alignment, 4.0/5 human score.

EDUCATION

MSc, Artificial Intelligence — Munster Technological University, Ireland (2024–2025)

BE, Computer Science — Savitribai Phule Pune University, India (2016–2020)

CERTIFICATIONS

UiPath Advanced RPA Developer · Automation Ninja (AIOps) · Microsoft: Deploy Spring Microservices to Azure, Build a Java App with Cosmos DB, Introduction to Java on Azure, Fundamental AI Concepts, Fundamentals of Machine Learning, Introduction to Git, Cloud Computing Fundamentals
